

Contract Name	Ruthven Bridge Replacement
Client	Highland Council
Value	£60k
Completed	March 2016
Description	The works included removal of the existing 9m span steel and timber bridge. New bank seats were precast and lifted into position. The new bridge was constructed with steel beams and a stress laminated timber deck.

Typical section of footpath

Contract Name	Raasay Spillway
Client	HIE
Value	£70k
Completed	November 2015
Description	Construction of a new concrete spillway and channel on the edge of an existing loch. Works had to be co-ordinated with a number of stakeholders including Raasay House Community Company, Forestry Commission and SEPA. Careful programming and site management ensured the works were completed on programme whilst minimising environmental impact.
